<p><b>Response Information</b></p>	<p>team of top notch physicists, engineers, molecular biologists and technicians working in close collaboration on rapid technology and product development, coupled with a world-class board and business development team, located in Silicon Valley, that has extensive experience in biotech tools company growth.</p> <p>We are concentrating on the development of the SCODA nucleic acid purification technology, a radically new form of electrophoresis-based sample preparation, to provide solutions to an extremely diverse range of applications, with a focus on rare biomarker detection in clinical samples. The novelty of our technology means we continually work with researchers from around the world who are constantly pushing the boundaries of their fields. We are also developing more advanced versions of the technology towards applications in diagnostics and detection – for applications in medicine, biodefense, and developing-country health applications.</p> <p>With R&amp;D facilities situated in a privately owned building on the beautiful UBC campus, Boreal has access to a wide range of resources and expertise through its connection to the university, and strong ties to the life sciences community in Vancouver and the Bay Area. We offer an open and friendly working environment, competitive benefits, and a commitment to professional growth and development.</p> <p>Send softcopy resume and cover letter in Word or PDF format to <a href="mailto:hr@borealgenomics.com">hr@borealgenomics.com</a>. Please include above reference number.</p>
